Collaborative Network for Industry, Manufacturing, Business and Logistics in Europe

NIMBLE will develop the infrastructure for a cloud-based, **Industrie 4.0, Internet-of-things enabled B2B** platform on which European manufacturing firms can register, publish machine- readable catalogs for products and services, search for suitable supply chain partners, negotiate contracts and supply logistics.

NIMBLE federated collaboration network with sector-centric platform instances

Federation Platform Instance

- Services providers
- Suppliers
- Manufacturers
- Logistic providers
- Retailers
- Software providers
- Cloud Services providers

Sector specific business model

Conformance to regional regulation and cultural norms

Interoperability services

Federation Platform Instance
